

Urtica

For more than 35 years, we have helped shape the pharmaceutical sector by developing solutions that support the Polish pharmaceutical market. We are Poland's largest nationwide pharmaceutical wholesaler and a leader in the hospital market. Our growth is built on openness, mutual trust, high standards of business conduct and strong relationships developed by our people.

We serve all hospitals in Poland as well as more than 1,000 other customers, including private healthcare providers and units of the State Sanitary Inspection. We work with manufacturers of generic, originator and innovative medicines, as well as hospitals, pharmacies, other healthcare providers and pharmaceutical wholesalers. We support pharmaceutical manufacturers across a range of activities, including product launches in Poland, warehousing, distribution and sales operations for the healthcare sector.

Our distribution portfolio includes Rx and OTC medicines, radiopharmaceuticals, medical devices, food supplements and food for special medical purposes (FSMP), among others. We also provide warehousing, inventory management and pharmaceutical logistics services, as well as support for hospital tender processes, contract execution, settlements and reporting.

In 2016, we opened a modern logistics centre in Łódź, integrating distribution processes for hospital supply with logistics services for pharmaceutical manufacturers. The facility provides the technical infrastructure required to manage individual stages of the supply chain in compliance with Polish pharmaceutical law and Good Distribution Practice (GDP) requirements.

We are also actively involved in professional education. We organise conferences and training initiatives for pharmacists from across Poland and publish *Farmakoekonomika Szpitalna*, a specialist journal providing hospital pharmacists with up-to-date professional knowledge.

Since 1997, we have also developed our corporate social responsibility activities through the nationwide **Urtica Dzieciom** initiative, which now operates as a foundation. Its activities for children treated in oncology and haematology wards include the *Słoneczna Galeria* art workshops and the Urtica Dzieciom Camp therapeutic programme. An important part of the initiative is the annual Gala and charity auction, with proceeds supporting paediatric oncology wards across Poland.

Our approach to social responsibility also includes initiatives for our employees. Through **Urtica Team**, they can take part in sports activities designed to support health and well-being.
